SUBJECT INDEX

Action spectra
action spectrum of phaeoplast displacements from the dark to the low intensity arrangement in the brown alga *Dictyota dichotoma*, 111
effects of UV radiation on cells, 21
Active oxygen
protective function of the apoprotein of the light-harvesting chlorophyll-*a*/*b*-protein complex in pigment photo-oxidation, 283
ADP/ATP translocator
haematoporphyrin derivative (Photofrin II) photosensitization of isolated mitochondria: inhibition of ADP/ATP translocator, 35
Aggregation
water soluble metal naphthalocyanines — near-IR photosensitizers: cellular uptake, toxicity and photosensitizing properties in NHIK 3025 human cancer cells, 379
Aminolevulinic acid
inactivation of erythrocytic, lymphocytic and myelocytic leukemic cells by photoexcitation of endogenous porphyrins, 195
Amphiphilic photosensitizers
mixed acenannellated metallotetraazaporphins: a new class of amphiphilic photosensitizers for the photodynamic therapy of cancer, 419
Antioxidant enzymes
the interaction of UVA radiation with cultured cells, 349
Atherosclerosis
time-resolved laser-induced fluorescence spectroscopy for enhanced demarcation of human atherosclerotic plaques, 363
Autoradiography
DNA excision-repair ability of embryonic fibroblasts measured by UDS and thymine dimer excorporation in four inbred mice strains, 75

Bacterial cell wall
partition of Rose Bengal anion from aqueous medium into a lipophilic environment in the cell envelope of *Salmonella typhimurium:* implications for cell-type targeting in photodynamic therapy, 171
Blue light
fast induction of translatable mRNA by blue light in *Neurospora crassa wt*: the *wc-1* and *wc-2* mutants are blind, 261

Cancer phototherapy
hematoporphyrin derivatives: an oligomeric composition study, 297
Carbocyanine dyes
transmembrane potential measurement with carbocyanine dye diS-C3-(5): fast fluoroscence decay studies, 321
Carcinogenesis
effects of UV radiation on cells, 21
Carotenoids
protective function of the apoprotein of the light-harvesting chlorophyll-*a*/*b*-protein complex in pigment photo-oxidation, 283
Cataract
quantitative photoacoustic spectroscopy of cataractous human lenses, 407
Chlorophyll
chlorophyll protein complexes related to photosystem I in *Chlamydomonas reinhardtii*, 97
effects of red and far-red light pulses on the chlorophyll and biliprotein accumulation in the red alga *Corallina elongata*, 185
protective function of the apoprotein of the light-harvesting chlorophyll-*a*/*b*-protein complex in pigment photo-oxidation, 283
Chloroplast
action spectrum of phaeoplast displacements from the dark to the low intensity arrangement in the brown alga *Dictyota dichotoma*, 111
heat-induced changes in the efficiency of P700 photo-oxidation in pea chloroplast membranes, 307

© Elsevier Sequoia/Printed in The Netherlands

Chromophores
effects of UV radiation on cells, 21
CIDNP
photo-CIDNP and ESR studies of a photosensitizing drug: nalidixic acid, 85
Ciliated protozoa
photomotile responses in ciliated protozoa, 243
Corallina elongata
effects of red and far-red light pulses on the chlorophyll and biliprotein accumulation in the red alga *Corallina elongata*, 185
Cytokines
effect of UV irradiation on epidermal cell cytokine production, 1

Dictyota
action spectrum of phaeoplast displacements from the dark to the low intensity arrangement in the brown alga *Dictyota dichotoma*, 111
Dihematoporphyrin ether
hematoporphyrin derivatives: an oligomeric composition study, 297
Dinucleotide analogues
stacking-controlled phototransformations of the 5-fluorouracil residues in dinucleotide model compounds, 15
DNA
different lethal effects by enzyme-generated triplet indole-3-aldehyde in different *Escherichia coli* strains, 371
DNA excision-repair ability of embryonic fibroblasts measured by UDS and thymine dimer excorporation in four inbred mice strains, 75
DNA photoreactivating enzyme from human tissues, 47
molecular dosimetry of 8-MOP + UVA-induced DNA photoadducts in *Saccharomyces cerevisiae:* correlation of lesions number with genotoxic potential, 57

Electrophoresis
chlorophyll–protein complexes related to photosystem I in *Chlamydomonas reinhardtii*, 97
Embryonic fibroblasts
DNA excision-repair ability of embryonic fibroblasts measured by UDS and thymine dimer excorporation in four inbred mice strains, 75
End-of-day effects
response of light-grown wild-type and *aurea*-mutant tomato plants to end-of-day far-red light, 391
Epidermal cells
effect of UV irradiation on epidermal cell cytokine production, 1
Escherichia coli
different lethal effects by enzyme-generated triplet indole-3-aldehyde in different *Escherichia coli* strains, 371
ESR spectroscopy
heat-induced changes in the efficiency of P700 photo-oxidation in pea chloroplast membranes, 307
photo-CIDNP and ESR studies of a photosensitizing drug: nalidixic acid, 85
Excitation energy transfer
chlorophyll-protein complexes related to photosystem I in *Chlamydomonas reinhardtii*, 97
Extracapsular cataract extraction
quantitative photoacoustic spectroscopy of cataractous human lenses, 407

Fibre optics
target sites of UV-B radiation in photosynthesis of higher plants, 145
Flash photolysis
viscosity-dependent isomerization and fluorescence yields of merocyanine 540, 273
Flash spectroscopy
target sites of UV-B radiation in photosynthesis of higher plants, 145
Fluorescence
chlorophyll–protein complexes related to photosystem I in *Chlamydomonas reinhardtii*, 97
heat-induced changes in the efficiency of P700 photo-oxidation in pea chloroplast membranes, 307
time-resolved laser-induced fluorescence spectroscopy for enhanced demarcation of human atherosclerotic plaques, 363
viscosity-dependent isomerization and fluorescence yields of merocyanine 540, 273

Fluorescence decay
decay time distribution analysis of Y_t-base in benzene–methanol mixtures, 159
transmembrane potential measurement with carbocyanine dye diS-C3-(5): fast fluorescence decay studies, 321
Fluorescence induction
target sites of UV-B radiation in photosynthesis of higher plants, 145
Fluorescence lifetime
transmembrane potential measurement with carbocyanine dye diS-C3-(5): fast fluorescence decay studies, 321
Fluorescent probe
transmembrane potential measurement with carbocyanine dye diS-C3-(5): fast fluorescence decay studies, 321
5-Fluorouracil
stacking-controlled phototransformations of the 5-fluorouracil residues in dinucleotide model compounds, 15
Frequency-domain fluorometry
decay time distribution analysis of Y_t-base in benzene-methanol mixtures, 159

Gel chromatography
hematoporphyrin derivatives: an oligomeric composition study, 297
Gene regulation
fast induction of translatable mRNA by blue light in *Neurospora crassa wt:* the *wc-1* and *wc-2* mutants are blind, 261
Glutaraldehyde
heat-induced changes in the efficiency of P700 photo-oxidation in pea chloroplast membranes, 307

Haematoporphyrin derivative
haematoporphyrin derivative (Photofrin II) photosensitization of isolated mitochondria: inhibition of ADP/ATP translocator, 35
hematoporphyrin derivatives: an oligomeric composition study, 297
protection of murine foot tissue and transplantable tumor against Photofrin-II-mediated photodynamic sensitization with WR-2721, 219
Heat stress
heat-induced changes in the efficiency of P700 photo-oxidation in pea chloroplast membranes, 307
Human serum albumin
irreversible photobinding of nitrofurantoin and of nitrofurfural to plasma proteins *in vitro,* 207

Immune response
effect of UV irradiation on epidermal cell cytokine production, 1
Immuno-suppression
effect of UV irradiation on epidermal cell cytokine production, 1
Indole-3-acetic acid
different lethal effects by enzyme-generated triplet indole-3-aldehyde in different *Escherichia coli* strains, 371
Indole-3-aldehyde
different lethal effects by enzyme-generated triplet indole-3-aldehyde in different *Escherichia coli* strains, 372
Intramolecular interactions
stacking-controlled phototransformations of the 5-fluorouracil residues in dinucleotide model compounds, 15
Iso-electric point
irreversible photobinding of nitrofurantoin and of nitrofurfural to plasma proteins *in vitro,* 207

Lens
quantitative photoacoustic spectroscopy of cataractous human lenses, 407
Leukemia
inactivation of erythrocytic, lymphocytic and myelocytic leukemic cells by photoexcitation of endogenous porphyrins, 195
Light stimulation
photomotile responses in ciliated protozoa, 243
Limonene
protective function of the apoprotein of the light-harvesting chlorophyll-*a*/*b*-protein complex in pigment photo-oxidation, 283
Lipopolysaccharide
partition of Rose Bengal anion from aqueous medium into a lipophilic environment in the cell envelope of *Salmonella typhimurium:* impli-

cations for cell-type targeting in photodynamic therapy, 171
Lorentzian distribution
decay time distribution analysis of Y_t-base in benzene-methanol mixtures, 159
Lycopersicon esculentum
response of light-grown wild-type and *aurea*-mutant tomato plants to end-of-day far-red light, 391

Membrane potential
transmembrane potential measurement with carbocyanine dye diS-C3-(5): fast fluorescence decay studies, 321
Merocyanine 540
viscosity-dependent isomerization and fluorescence yields of merocyanine 540, 273
Mitochondria
haematoporphyrin derivative (Photofrin II) photosensitization of isolated mitochondria: inhibition of ADP/ATP translocator, 35
Molecular dosimetry
molecular dosimetry of 8-MOP + UVA-induced DNA photoadducts in *Saccharomyces cerevisiae:* correlation of lesions number with genotoxic potential, 57
Multiexponential analysis
decay time distribution analysis of Y_t-base in benzene-methanol mixtures, 159
Mutagenesis
effects of UV radiation on cells, 21
molecular dosimetry of 8-MOP + UVA-induced DNA photoadducts in *Saccharomyces cerevisiae:* correlation of lesions number with genotoxic potential, 57

Nalidixic acid
photo-CIDNP and ESR studies of a photosensitizing drug: nalidixic acid, 85
the mechanism of photohaemolysis by photoproducts of nalidixic acid, 329
Naphthalocyanines
water-soluble metal naphthalocyanines-near-IR photosensitizers: cellular uptake, toxicity and photosensitizing properties in NHIK 3025 human cancer cells, 379
Neurospora crassa
fast induction of translatable mRNA by blue light in *Neurospora crassa wt:* the *wc-1* and *wc-2* mutants are blind, 261

Oxidative phosphorylation
haematoporphyrin derivative (Photofrin II) photosensitization of isolated mitochondria: inhibition of ADP/ATP translocator, 35
Oxidative stress
the interaction of UVA radiation with cultured cells, 349
Oxygen barrier
protective function of the apoprotein of the light-harvesting chlorophyll-*a*/*b*-protein complex in pigment photo-oxidation, 283
Ozone
target sites of UV-B radiation in photosynthesis of higher plants, 145

Photoacoustic spectroscopy
quantitative photoacoustic spectroscopy of cataractous human lenses, 407
Photobinding
irreversible photobinding of nitrofurantoin and of nitrofurfural to plasma proteins *in vitro,* 207
Photocytotoxicity
mixed acenannellated metallotetraazaporphins: a new class of amphiphilic photosensitizers for the photodynamic therapy of cancer, 419
Photodynamic action
partition of Rose Bengal anion from aqueous medium into a lipophilic environment in the cell envelope of *Salmonella typhimurium:* implications for cell-type targeting in photodynamic therapy, 171
the mechanism of photohaemolysis by photoproducts of nalidixic acid, 329
Photodynamic therapy
inactivation of erythrocytic, lymphocytic and myelocytic leukemic cells by photoexcitation of endogenous porphyrins, 195
protection of murine foot tissue and transplantable tumor against Photofrin-II-mediated photodynamic sensitation with WR-2721, 219

mixed acenannellated metallotetraazaporphins: a new class of amphiphilic photosensitizers for the photodynamic therapy of cancer, 419
Photohaemolysis
the mechanism of photohaemolysis by photoproducts of nalidixic acid, 329
Photoisomer
viscosity-dependent isomerization and fluorescence yields of merocyanine 540, 273
Photokinesis
photomotile responses in ciliated protozoa, 243
Photoproducts in DNA
effects of UV radiation on cells, 21
Photoprotection
protection of murine foot tissue and transplantable tumor against Photofrin-II-mediated photodynamic sensitization with WR-2721, 219
the interaction of UVA radiation with cultured cells, 349
Photoreactivating enzyme
DNA photoreactivating enzyme from human tissues, 47
Photoreceptor
action spectrum of phaeoplast displacements from the dark to the low intensity arrangement in the brown alga *Dictyota dichotoma*, 111
Photosensitization
haematoporphyrin derivative (Photofrin II) photosensitization of isolated mitochondria: inhibition of ADP/ATP translocator, 35
hematoporphyrin derivatives: an oligomeric composition study, 297
photo-CIDNP and ESR studies of a photosensitizing drug: nalidixic acid, 85
the mechanism of photohaemolysis by photoproducts of nalidixic acid, 329
viscosity-dependent isomerization and fluorescence yields of merocyanine 540, 273
water-soluble metal naphthalocyanines — near-IR photo-sensitizers; cellular uptake, toxicity and photosensitizing properties in NHIK 3025 human cancer cells, 379
Photosynthesis
chlorophyll–protein complexes related to photosystem I in *Chlamydomonas reinhardtii*, 97
target sites of UV-B radiation in photosynthesis of higher plants, 145
Photosystem I
chlorophyll–protein complexes related to photosystem I in *Chlamydomonas reinhardtii*, 97
Phototoxicity
irreversible photobinding of nitrofurantoin and of nitrofurfural to plasma proteins *in vitro*, 207
the mechanism of photohaemolysis by photoproducts of nalidixic acid, 329
Phototransformations
stacking-controlled phototransformations of the 5-fluorouracil residues in dinucleotide model compounds, 15
Phycobiliprotein
effects of red and far-red light pulses on the chlorophyll and biliprotein accumulation in the red alga *Corallina elongata*, 185
Physiological mutants
response of light-grown wild-type and *aurea*-mutant tomato plants to end-of-day far-red light, 391
Phytochrome
effects of red and far-red light pulses on the chlorophyll and biliprotein accumulation in the red alga *Corallina elongata*, 185
response of light-grown wild-type and *aurea*-mutant tomato plants to end-of-day far-red light, 391
Picosecond laser
time-resolved laser-induced fluorescence spectroscopy for enhanced demarcation of human atherosclerotic plagues, 363
Plasma proteins
irreversible photobinding of nitrofurantoin and of nitrofurfural to plasma proteins *in vitro*, 207
Porphyrins
hematoporphyrin derivatives: an oligomeric composition study, 297
inactivation of erythrocytic, lymphocytic and myelocytic leukemic cells by photoexcitation of endogenous porphyrins, 195
Psoralen
molecular dosimetry of 8-MOP + UVA-induced DNA photoadducts in

Saccaromyces cerevisiae: correlation of lesions number with genotoxic potential, 57
Pyrimidine dimer
DNA photoreactivating enzyme from human tissues, 47

Quinolones
photo-CIDNP and ESR studies of a photosensitizing drug: nalidixic acid, 85

Radioprotection
protection of murine foot tissue and transplantable tumor against Photofrin-II-mediated photodynamic sensitization with WR-2721, 219
Repair enzyme
DNA photoreactivating enzyme from human tissues, 47
Rhodophyta
effects of red and far-red light pulses on the chlorophyll and biliprotein accumulation in the red alga *Corallina elongata,* 185
Rose Bengal fluorescence
partition of Rose Bengal anion from aqueous medium into a lipophilic environment in the cell envelope of *Salmonella typhimurium:* implications for cell-type targeting in photodynamic therapy, 171

Saccharomyces cerevisiae
molecular dosimetry of 8-MOP + UVA-induced DNA photoadducts in *Saccharomyces cerevisiae:* correlation of lesions number with genotoxic potential, 57
Salmonella bacteria
partition of Rose Bengal anion from aqueous medium into a lipophilic environment in the cell envelope of *Salmonella typhimurium:* implications for cell-type targeting in photodynamic therapy, 171
Singlet oxygen
viscosity-dependent isomerization and fluorescence yields of merocyanine 540, 273
Sulfhydryl compounds
protection of murine foot tissue and transplantable tumor against Photofrin-II-mediated photodynamic sensitization with WR-2721, 219

4-Thiouridine
different lethal effects by enzyme-generated triplet indole-3-aldehyde in different *Escherichia coli* strains, 371
3H-Thymidine
DNA excision-repair ability of embryonic fibroblasts measured by UDS and thymine dimer excorporation in four inbred mice strains, 75
Thymine dimer
DNA excision-repair ability of embryonic fibroblasts measured by UDS and thymine dimer excorporation in four inbred mice strains, 75
Time-resolved fluorescence
time-resolved laser-induced fluorescence spectroscopy for enhanced demarcation of human atherosclerotic plaques, 363
transmembrane potential measurement with carbocyanine dye diS-C3-(5): fast fluorescence decay studies, 321
Tissue diagnosis
time-resolved laser-induced fluorescence spectroscopy for enhanced demarcation of human atherosclerotic plaques, 363
Triplet state
different lethal effects by enzyme-generated triplet indole-3-aldehyde in different *Escherichia coli* strains, 371

UV light
effect of UV irradiation on epidermal cell cytokine production, 1
effects of UV radiation on cells, 21
fast induction of translatable mRNA by blue light in *Neurospora crassa wt:* the *wc-1* and *wc-2* mutants are blind, 261
quantitative photoacoustic spectroscopy of cataractous human lenses, 407
the interaction of UVA radiation with cultured cells, 349

wc mutants
fast induction of translatable mRNA by blue light in *Neurospora crassa wt:* the *wc-1* and *wc-2* mutants are blind, 261
